Very cheap and very fun. Doesn't require a super PC to play either.. I really like this game but I hope it gets fleshed out a bit. Kids need more interaction to keep their interest, like digging for treasure or feeding the fish or something. There also needs to be more to do right in the middle of the play space. There's an arch that begs for kids to walk through it but it's outside the Chaperone. Obviously there's no teleportation or anything too complicated for kids to learn, so the action needs to be brought to them. There is a turtle to interact with but that won't be a long term interest. There needs to be more.. This game is DEEP. The engine makes for a completely realistic sim. Too much spending and not enough revenue will run your company straight into the ground and the things you do behind the scenes matter just as much as the shows you put on. By the same token, the text basis of the game may not be a graphic masterpiece but if you have a little imagination you can see it all in your head and it boosts an already-great game to a whole new level. TEW is easy to mod into the real world and by putting yourself into the game but Adam Ryland has created his own universe that is possibly more intriguing anyway. I find myself thinking about what I'm going to do next even when I'm not playing the game and in that way it completely immerses you into its world. If you find the behind the scenes of the business interesting in any way, this will be worth way more than the pricetag Steam puts on it.

My only problem with the game is that when I put myself into the game, the highest rating I could get on my "sexy" gimmick was an E-. bought it bcs i dnt know where to spend my money lol. This game will never leave the deep inside of my nostalgic heart

A very strange and eerie game, its a fun little adventure game definitely worth trying over the spooky season. Bit short but I'm sure there are things I have yet to discover in the game.. I wish I had this on N64 or PS1. Dope!!!!!!!!!!!!!!!!!!!!!!!!!!!!. DO NOT BUY.

Completely broken idle clicker. Go play a free idle clicker in your browser or here on Steam.

- The idle clicker mechanic where you get a multiplier after a reset is displayed ingame but does not work. You will forever stay at 0% bonus
- Game automatically saves, but when you start it up again, the upgrade multipliers you bought have no effect anymore. You cannot buy them again until you reset.
- Alt+TAB out and back into the game to switch off the annoying music
- Seems to use the infamous "minimum" settings of the Unity engine where the engine goes crazy and uses 40% CPU and GPU power or more.

I want the hour I poked at this mess back.. Now I can play Swindlestones on PC!

Nice job, inkle!

10/10. Wow, that was quite a ride. I liked the variance in the riddles, not just 4 digit combination locks but reading, math, placing and logic puzzles. A lot of different environments, looking outside from the spaceship was a great view! This one was even longer than the mine, with three different places that you visit and a story that gets revealed as you go along, if you take the time to read any notes found.
